- b) a polymerizable monomer that is hydrophobic and has ethylenically unsaturated groups;
- c) a polymerization initiator; and
- d) dispersion of coloring fine particles.

The closest prior art appears to be JP 2001-247788, which discloses an inkjet ink of fine particles, oil soluble dye, and polymeric species, but does not disclose a monomer and polymerization initiator, nor does '788 disclose the oxidation potential of the dye, which affects the ozone fastness of an ink.
